Natural soap production from Carinthia, Austria using traditional recipes

Our **handmade** plant-oil soaps are only made from **high-quality** plant oils and plant-fats. Glycerin, which is pleasant for the skin, remains in the soap where it acts as moisturizer and protects the skin from drying out. In industrially produced soaps glycerin will be withdrawn and instead other chemical additives are mixed into the soap.

Our natural soap is **free from synthetic foaming agents**, preservatives or other chemical additives. Therefore, the soap is much gentler to the skin than industrially produced soaps. In addition, our final natural soap product includes a proportion of free, unsaponified oils, which generate a **moisturizing effect**. As perfumes we mainly use essential oils or perfume oils, which are specially approved oils for soap boiling.

Each soap bar is handmade and unique, therefore small deviations in shape and colour are possible. **Each bar matures at least 4-6 weeks** before it is sold.

Alexandra Polster, Seifenstueck.at and her „Seifenfieber“

Passion doesn't start without impact that kindles enthusiasm. Alexandra Polster's personal experiences sparked her interest in soaps, which led to her first experiments with soap. As a result she felt the need to learn more about soap making and subsequently she decided to **become a professional soap boiler**. After finishing a course on soap boiling at the WIFI Klagenfurt in 2012, she was entitled to **register her own business** and work as a traditional soap maker. This step in her career really excited her and nowadays Ms Polster still works with the same passion and enthusiasm that she felt when she first discovered soap boiling.

Since 2013 she has been working as a professional soap boiler in her own manufacture in Klagenfurt. An important aspect for her work is the combination of **traditional craftsmanship and new, modern ideas**. Furthermore, she loves sharing her passion in regular workshops. With advanced announcement visitors are always welcome in the manufacture.

Seifen Stück

Handgesiedete Naturseife aus Kärnten

All our soaps are handmade, vegan and free from palm oil.

Exception: Soap from ostrich's fat is free from palm oil but not vegan.

Additionally, we produce **soaps with company logos** or **soaps for certain topics** (for example Hirter Beer Soap, Wörthersee Soap). Our repertoire also includes giveaways for weddings and other special occasions.

All our soaps are produced in Austria.

Wörthersee Soap

Hirter Beer Soap

Our classics

Little rosemary

A play of rosemary and lovely lime: United through the heavy smell of patchouli both scents wonderfully compliment each other – this creates a fragrance that might remind one of past Mediterranean holidays.

Little Rosemary is handmade with love.

Lavender soap

The scent of lavender is enchanting and has a relaxing effect. It's a soothing soap that nurtures the skin every day.

Scent: essential lavender oil, patchouli

Ingredients: Olive oil, coconut oil, babassu oil, shea butter,

Arolla pine meets lemon

A trace of the Nock Mountains is added to this soap by including real Carinthian arolla pine oil. Mixing arolla pine and lemon creates a special scent. Arolla pine has a calming effect while the scent of lemon is activating. You can literally smell the mountains.

Handgesiedete Naturseife aus Kärnten

Alpha male hemp seed oil

This soap makes a good morning. Mint, cinnamon and rustic spruce give the soap an additional smell of freshness that lingers on the skin. It's a vitalizing shower soap that is ideal for a dynamic start into the day. This soap is perfect for hot summer days.

Scent: essential mint oil, cinnamon, spruce

Ingredients: Olive oil, coconut oil, organic hemp seed oil, shea butter, sea algae

Limoncello and lemon

Using this soap is a special experience – poppy seeds create a peeling while lemon adds the feeling of freshness. All our soaps are handmade.

Scent: essential lemon oil

Ingredients: Olive oil, coconut oil, rape seed oil, coconut milk and poppy seed

Soap from ostrich's fat

Our soap from ostrich's fat is naturally soothing and a mixture of vanilla, cloves and cedar. Next to its earthy as well as sweet fragrance is ostrich's fat known for its positive effects for skin and hair. Therefore, it is valued as a natural care product.

Ingredients: Ostrich's fat, olive oil, coconut oil, shea butter, cocoa butter and essential oils
